survey made with arm to a

WEIGHT MEASUREMENT

Does the daily mistake of small doses weigh upon your yearly balance?

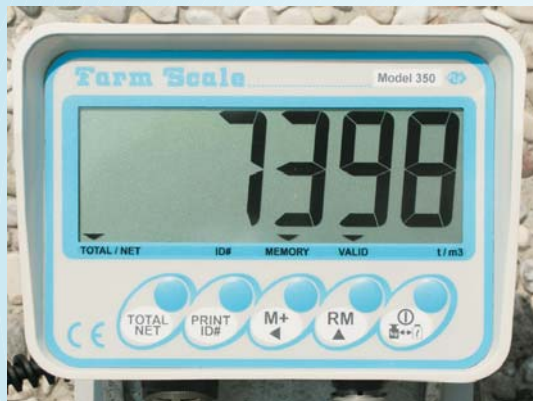

The application of our weighing system to your
milk tank will assure a precise control of the quantities of
produced milk and a monitoring of waste.

The system is easy to install and to use and is composed of:

- weight indicator model 350
- shear beam load cells with capacity from 500 to 10.000 Kg
- mechanical supports for load cells and chassis (if necessary)
- connecting parts

WEIGHT INDICATOR MOD. 350 FOR MILKTANK

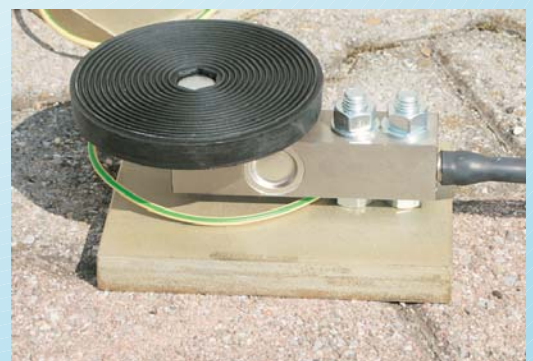

It is a microcomputer which allows the weight direct reading, the temporary zeroing for partial weighings and the storage in non-volatile memory of the various weighings (at the end of the month you can have the total milk production thanks to the storage function) with the relevant product code or animal code. Moreover, it has automatic and manual tests indicating the battery voltage, anomalies on cables or damaged sensors.

- high readability backlit display
- base StarBus output for printer
- automatic storage and print of daily production
- automatic conversion Kg/litres

SHEAR BEAM LOAD CELL

Rectangular shape, 3 fixing holes.
Material: stainless steel.
Nominal capacity from 2 tons to 60 tons
Precision 0.1%
Acceptable overload 150%.
Sensitive parts protected by a special resin resistant to atmospheric agents and to the presence of water/washing in milking room.
Particularly suitable for platforms, silos, liquid or solid feed tanks.

On request it is possible to supply registered weighing systems
